WHEREAS, the State has experienced a dramatic increase in the commission of drug-related and violent felony offenses by undocumented aliens subject to deportation; and

WHEREAS, the State's law enforcement agencies, court and detention facilities are becoming increasingly overburdened as a result of the commission of such crimes by undocumented aliens subject to deportation; and

WHEREAS, the identification of deportable aliens while they are incarcerated is essential to a successful joint effort by the State and United States Immigration and Naturalization Service to deport such persons upon release from custody; and

WHEREAS, the United States Congress, recognizing these problems, enacted the Immigration Reform and Control Act of 1986 which directs the United States Immigration and Naturalization Service to initiate deportation proceedings against undocumented aliens as expeditiously as possible following a criminal conviction;

NOW, THEREFORE, I, GEORGE DEUKMEJIAN, Governor of the State of California, by virtue of the power and authority vested in me by the Constitution and Statutes of the State of California, do hereby issue this order to become effective immediately.

The Department of Corrections shall take the following actions with regard to illegal aliens convicted of felony offenses in California:

1. Implement procedures for the early identification of persons serving terms in state prison who are undocumented aliens subject to deportation;

EXECUTIVE ORDER NO. W-3-91

WHEREAS, most regions of the State of California have experienced conditions of drought for the previous four years, and some regions in Central and Southern California have experienced drought conditions for the past seven years; and

WHEREAS, California has received less than 25 percent of its normal rainfall for this water year, and there only remains two and one-half months in which significant rainfall can be anticipated; and

WHEREAS, reservoir storage throughout California is substantially depleted; with most reservoirs at or near an all-time low; with many reservoirs dropping to near their minimum pool levels; and some reservoirs holding less than they did in the 1976-77 drought; and

WHEREAS, the State Water Resources Control Board has held special hearings on the need to take specific steps to mitigate the effects of the current and possible future drought conditions; and

WHEREAS, the Emergency Services Act confers extraordinary powers on the Governor to provide leadership in responding to emergencies which are beyond the control of any individual city or county or which require a coordinated statewide response; and

WHEREAS, it is now necessary for all agencies of the State of California to undertake steps to mitigate the effects of the current drought, and to develop the information necessary to enable the Governor to coordinate and direct remedial actions at all levels of government within the state to combat existing or threatened drought-caused conditions of disaster or peril to persons or property should it become necessary to proclaim a state of emergency under the Emergency Services Act; and

WHEREAS, many cities, counties, and water purveyors in California have already taken significant actions to deal with the drought; those which do not already have drought emergency plans should be encouraged to plan now for future actions necessary to mitigate the effects of the drought, and all counties should be encouraged to appoint a drought coordinator, so that State and local agencies can make a coordinated response to any future drought emergency; and

WHEREAS, impacts of the drought can reach virtually all of California's population, affect its natural resources and its economy, and mitigating the drought's impact will require the cooperation of all of our citizens, elected officials, and public agencies;

NOW THEREFORE, I, Pete Wilson, Governor of the State of California, by virtue of the power and authority vested in me by the Constitution and statutes of the State of California, do hereby issue the following orders and directives to become effective immediately:

IT IS ORDERED that The Director of Water Resources is hereby appointed as the Governor's Drought Administrator who shall be the Governor's representative with respect to all matters related to implementing this Executive Order, and any subsequent orders or directives with respect to the drought; and

PAGE 2

IT IS FURTHER ORDERED that the Drought Action Team is hereby established. The Governor's Drought Administrator shall serve as its Chair. The Action Team shall consist of the following persons, together with the directors or executive officers of such other agencies as may be appointed upon the recommendation of the Administrator, where he finds that their department or agency has statutory responsibilities, expertise, or resources which would significantly contribute to mitigation of the effects of the drought:

 Director of the Department of Food and Agriculture
 Director of the Office of Emergency Services
 Director of the Department of Finance
 Director of the Department of Fish and Game
 Director of the Department of Forestry and Fire Protection
 Director of the Department of Health Services
 Director of the Office of Planning and Research
 Adjutant General of the Military Department

The Governor's Drought Administrator shall also invite the participation of any independent boards and commissions and federal agencies which have jurisdiction, expertise and resources which would significantly contribute to the mitigation of the effects of the drought, including, but not limited to the following:

State Water Resources Control Board
 Public Utilities Commission
 United States Department of Agriculture
 United States Department of the Interior
 United States Army Corps of Engineers
 Federal Emergency Management Agency

IT IS FURTHER ORDERED, that the general duties of the Drought Action Team include, but are not limited to, directing and coordinating state efforts to combat the effects of the drought, encouraging the preparation and implementation of local drought emergency plans, providing liaison and coordination between state and local efforts, and providing the Executive Department of the State of California with periodic reports on the status of the drought, together with recommendations for timely actions to remedy the effects of the drought. Specific duties of the Action Team shall include, but are not limited to, the following:

- * The Action Team shall report regularly to the Governor on water supply conditions in California and the status of state and local efforts to combat the drought's effects. The Action Team shall recommend any additional measures which it deems necessary to combat the drought and protect the health, safety, and property of the people, while providing maximum feasible protection to the important environmental resources of the State. The first report shall emphasize water supply conditions and shall be made no later than February 15, 1991.
- * The reports shall contain any information the Action Team finds to be of assistance to the Governor in determining whether and when to proclaim a state of emergency due to drought conditions and shall include an assessment of equitable issues and a rational framework for "sharing the pain" if extraordinary measures are recommended.
- * The Action Team shall review and report on the availability and effectiveness of state and federal financial assistance programs for the relief of critical domestic water supply shortages, drought-induced water shortages which threaten the viability of environmental resources, including significant fish and wildlife populations, drought-induced adverse impacts to the economy, and any other adverse effects of the drought. The Action Team shall also recommend state and federal legislation, as appropriate, to provide emergency financial assistance.

PAGE 3

IT IS FURTHER ORDERED, that the Department of Water Resources and the Office of Emergency Services shall provide staff to assist the Action Team in carrying out its responsibilities. The Governor's Drought Administrator may also call upon other departments for staff as needed; and

IT IS FURTHER ORDERED, that the Department of Water Resources shall do the following:

- * The Department shall provide increased technical assistance and coordination to local water supply agencies on the development and implementation of water conservation measures.
- * The Department shall develop a clearinghouse for facilitating water marketing transactions between willing sellers and buyers of water, consistent with the need to protect fish and wildlife resources.
- * The Department shall review the effectiveness of water conservation measures ordered for all state agencies and departments pursuant to Executive Order D-85-90, and shall recommend any further actions necessary to effect the water savings directed in that Executive Order, together with such additional water savings as the Department believes to be reasonably attainable, in view of the severity of regional water shortages.
- * The Department shall expand the Drought Center, which has been operating since 1986, as necessary to provide a focal point for drought activities, including providing information and assistance; and

IT IS FURTHER ORDERED, that the Department of Health Services shall evaluate and report to the Governor's Drought Administrator on the feasibility of temporary revisions of applicable water quality standards to make additional supplies of water available for beneficial uses, consistent with the protection of public health, including, but not limited to, expanded use of gray water, use of available ground water, and expanded use of reclaimed water; and

IT IS FURTHER ORDERED, that the State Water Resources Control Board is requested to hold further hearings on the drought, as appropriate, and coordinate its hearings with the Governor's Drought Administrator and the Drought Action Team; and

IT IS FURTHER ORDERED, that all state agencies and departments shall fully cooperate with the Governor's Drought Administrator, and communicate to the Executive Department of the State of California through the Administrator with respect to all matters pertaining to the drought and the actions to be taken pursuant to this Executive Order and all future orders and directives that may be issued to mitigate the effects of the drought.
